EDUCATION

Engineer of in Information Technology

Tra Vinh University

2021 - 2025

SKILL

- HTML, CSS, SCSS, JS , C#

- Reactjs, Redux ,Material UI, Bootstrap

- Nodejs Express, Socket.IO

- Mysql, Sql, Mongodb

PROFILE

I am Ho Hoang Phuc, a 4th-year student majoring in web application development with hands-on experience in projects using ReactJS for frontend and Node.js for backend. With a passion for technology and a strong desire to learn, I constantly strive to update and improve my skills in web development.

PROJECT

Team of 3 - Managing and Optimizing Lecturer Teaching Hours

June 15, 2024 - Present

React.js, Material UI, Node.js, Mysql

Web - Fullstack Developer

- Tasks I Completed in the System:
- Implemented **user authentication** on the frontend.
- Developed several **APIs** for system functionality.
- Designed a **responsive user interface** suitable for various device types.
- Integrated an **algorithm for automatic lecturer assignment** based on priority.
- Ensured **smooth and visually appealing interface interactions.**
- Github Project: https://github.com/tinthanhtv2014/Application-Managing-and-Optimizing-Faculty-Teaching-Hours

Team of 3 - Developed an E-commerce Website for Shoe Sales

April 22, 2024 - June 19, 2024

React.js, Bootstrap, Node.js Express, Mysql, MongoDB

Web - Frontend Developer

Tasks I Completed in the System:

- Secure **user authentication and authorization system** using **JWT.**
- Integrated **real-time chat functionality** between admin and customers.
- Managed **customer information and statistics**, including **charts and reports**.
- Implemented **product management** allowing users to add, edit, and delete shoe products.
- Created s**hopping cart functionality** enabling users to add products and proceed to checkout.
- Developed **order managemen**t for administrators.
- Github Project: https://github.com/BaoQuocZero/DA_CongNghe PhanMem_ShopShoe_JS

Solo - Chat Messenger Application

React.js, Node.js, Socket.io, Bootstrap, MongoDB

Web - Fullstack Developer

- This project is a **real-time chat messenger application** where users can **send messages to each other** and **change their avatars**.
- The application utilizes **Socket.io** for real-time communication, allowing **instant message delivery** between users.
- The user interface is designed with **Bootstrap** for a responsive and user-friendly experience.
- All user information and messages are stored in **MongoDB**, ensuring data persistence and easy retrieval.
- Github Project: https://github.com/Minurte1/Chat-Messanger-Nodejs Socket-Reactjs.git
